**BOUNDLESS VISION
ENDLESS CARE**

**ASR-4000
Digital Mammography System**

Super Configuration

High-precision Multi-function Rack

High accuracy movement control; x-ray tube rotates around detector isocenter; it provides hardware support for breast tomosynthesis and breast biopsy

The Best Choice for High Quality Mammography

The third generation full size amorphous Silicon (a-Si) flat panel detector with high x-ray conversion efficiency, better image resolution and contrast

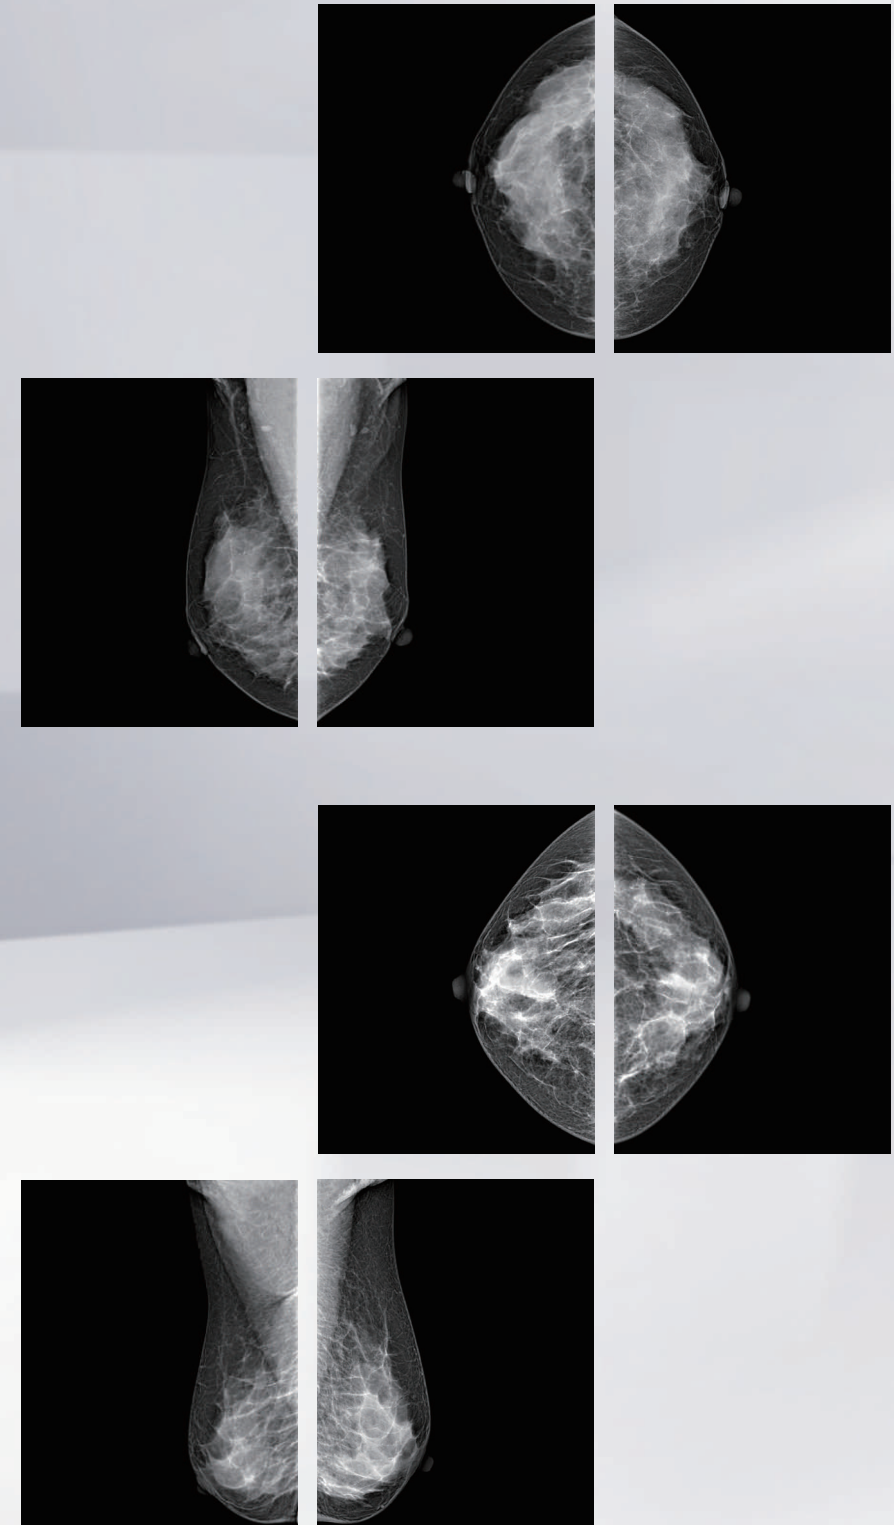

Fully Automatic Exposure Technology

Precise and low dosage ensures the clarity of breasts

Excellent Image Quality

Innovative Human-care Design

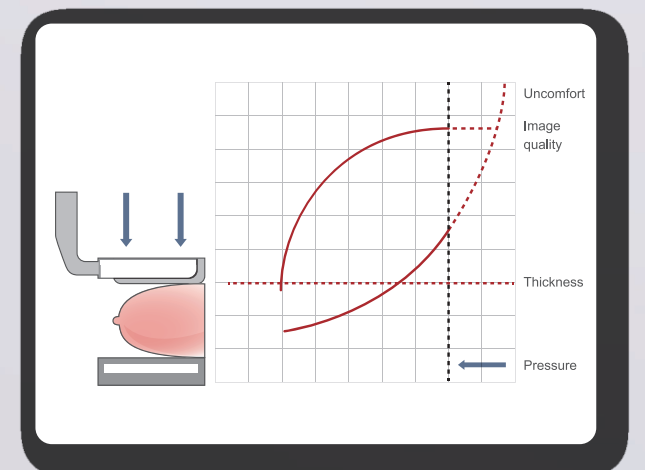

Safety

Threshold pressure control technology ensures safety

Comfort

Multi-frequency self-induced compression technology ensures the best image quality and reduces patients' pain maximally

Easy Operation

High intelligent positioning by one button provides easy operation and improves work efficiency
